SUMMARY

Motivated data analyst with a strong foundation in Python, SQL, and data visualization. Skilled in transforming complex datasets into actionable insights through exploratory analysis and storytelling. Experienced with Looker Studio, Pandas, and Scikit-learn, and capable of developing interactive dashboards using React and Tailwind CSS. Passionate about combining data analytics and modern web technologies to deliver impactful, user-centered solutions.

EDUCATION

Bachelor of Informatics **Aug 2024 – Present**

Universitas Multimedia Nusantara

- Relevant coursework in Data Science, Database Systems, and Software Engineering.

Vocational High School in Software Engineering **Jun 2021 – Jul 2024**

SMKN 4 Kota Tangerang

- Focused on software development fundamentals, system design, and web technologies.
-

BOOTCAMP

DIGITAL SKOLA – DATA SCIENCE BOOTCAMP **Jul 2025 – Nov 2025**

- Completed an intensive 3-month program covering data analysis, machine learning, and applied data storytelling.
 - Learned hands-on skills in Python, SQL, Git, Google Colab, and Looker Studio through project-based learning.
 - Built multiple end-to-end projects including data wrangling, exploratory analysis, visualization, and model deployment.
 - Collaborated in team-based projects to deliver business-oriented data solutions and final presentations.
 - Developed a solid understanding of data science workflow — from data preprocessing and feature engineering to regression, classification, and clustering models.
 - Enhanced professional readiness through enrichment sessions on version control, communication, and analytical storytelling.
-

ACHIEVEMENTS

 **3RD PLACE – SURABAYADEV DEVELOPER BATTLE 2025** **Oct 2025**

- Recognized for developing a data-driven hotel revenue management solution with strong analytical insights and storytelling.

PROJECT

PROACTIVE CANCELLATION MANAGEMENT – DATA-DRIVEN HOTEL REVENUE STRATEGY

- Analyzed hotel booking patterns to identify drivers of high cancellation rates.
- Built interactive dashboard to translate data into actionable business insights.
- Proposed strategic recommendations that optimized hotel revenue and reduced losses
- Recognized for clear storytelling, analytical depth, and strong presentation during competition.

DASHBOARD ANALYSIS: CONSUMER BEHAVIOR & FINANCIAL INSIGHTS

- Developed interactive dashboard using Python and Looker Studio to analyze consumer spending behavior.
- Applied correlation and segmentation analysis to uncover trends in debt usage and financial anxiety.
- Designed modern dark-mode interface with intuitive navigation and storytelling flow.
- Delivered insights that challenged industry assumptions and proposed prescriptive solutions.

BISASINEMA – CREATIVE FILM COMMUNITY WEBSITE

- Developed a responsive website to showcase workshops, film production content, and community events.
- Built a backend system for admin to manage ticket sales, upload photos/videos, and update event details dynamically.
- Structured pages for education programs, video series, and film screenings with clear navigation and modern UI.
- Enabled centralized content management to support regular updates and multimedia publishing.
- Delivered a digital platform that strengthens bisasinema's role as a creative hub for film education and collaboration.

INDUSTRIAL COMPANY PROFILE WEBSITE – ENERGY & SMART TECH SOLUTION

- Built a corporate profile website highlighting services in boiler, electrical, energy, and smart technology
- Created dedicated sections for projects, services, and company background with professional layout
- Delivered a modern, accessible platform to strengthen company branding and stakeholder engagement

FIELD WORK INTERNSHIP

PT ANUGRAH ENERGI INDONESIA

Jun 2023 - Oct 2023

Frontend Developer

- Proactively expanded front-end development expertise by learning and applying React and Tailwind CSS to build responsive, scalable, and visually appealing web applications.
- Demonstrated adaptability and continuous learning by mastering modern component-based architecture and utility-first styling to deliver efficient user experiences

COMMUNITY & VOLUNTEERING

AI COMMUNITY – UNIVERSITAS MULTIMEDIA NUSANTARA

Jul 2025 - Present

Active Member & Volunteer

- Participated in Open House Workshop, presenting AI lab to visiting parents and students, explaining AI concepts and tools
 - Volunteered in Campus Visit Workshop, guiding high school students through AI demonstrations and lab tours
 - Contributed to community growth through presentations and interactive sessions
-

ORGANIZATION /COMITEE

DUTA ANTI NARKOBA

Dec 2024 - Present

Coordinator of the Website Division

- Led and organized a web development team, assigning responsibilities for key pages such as "About Us" and "Events" to ensure efficient workflow and clear ownership.
- Set up and maintained a collaborative GitHub repository, managing branches and pull requests to streamline team contributions and version control.
- Mentored team members in Tailwind CSS and React, providing guidance and hands-on support to enhance their frontend development skills.

STARLIGHT

Oct 2024 - Present

Member of the Website Division

- Took charge of managing the division and was responsible for onboarding new members (referred to as Mini Gerda), ensuring a smooth integration into the team.
 - Strengthened collaboration and communication skills through active participation in a team-based workflow and cross-functional discussions.
-

CERTIFICATE

DIGITAL SKOLA – DATA SCIENCE BOOTCAMP (GRADUATED WITH EXCELLENT)	Nov 2025
PYTHON FOR DATA SCIENCE, AI & DEVELOPMENT – IBM VIA COURSERA	Jan 2025
PYTHON PROJECT FOR DATA SCIENCE – IBM (COURSERA)	Jan 2025
THE DATA SCIENCE PROFESSION – STUDENT VIEW – UNIVERSITY OF LONDON (COURSERA)	Jan 2025
DATA VISUALIZATION WITH PYTHON – IBM (COURSERA)	Feb 2025
DATA SCIENCE PROJECT CAPSTONE: PREDICTING BICYCLE RENTAL – UNIVERSITY OF LONDON (COURSERA)	Jan 2025

SKILLS

- **Frontend Development:** TailwindCSS, Javascript(Familiar), React
- **Backend Development:** Node.js(Familiar)
- **Framework:** React, Express.js(Familiar)
- **Database & Querying:** MySQL (Proficient)
- **Development Tools & Environments:** Visual Studio, Git Hub
- **Programming for Data Science & Machine Learning:** Python
- **Libraries & Frameworks:** Pandas, NumPy, Seaborn, Matplotlib, Folium, Scikit-learn
- **Data Science Tools:** Jupyter Notebook, Google Collab, Looker Studio
- **Data Handling & Visualization:** Data Cleaning, Data Storytelling, SQL for Data Analysis
- **Soft Skills:** Presentation, Public Speaking, Collaboration (especially through AI community workshops and volunteering)
